Subject: Microsoft Settlement

Even though I am a windows-PC user, I hoped that Microsoft would have been slit into different companies so that more competition would have taken place, to my and other's advantage. Since this did not happen, I believe that the government would at the very least teach Microsoft a lesson. Please do not allow MS to cheat the government, industry, and the people. They are proud, dishonest, and unrepentant. They think and act as if they are POWERFUL and above the law. At the very least, do not allow them to dictate the terms of settlement - "\$1 Billion" worth of PC's and software which they will dictate, is not really "1 Billion dollars", and will hit Apple in the education market (a real irony!). Please prove to MS that it is the government exercising justice with and for the people that will prevail.
